COTTON.

New Orleans Cotton.
New Orleans, La., July 30.—Liverpool cotton is closed today because of the bank holiday and the directors of the exchange have announced that the exchange would remain closed over Monday. However, the foreign markets have had little to do with the market on this side, as the center of interest is the domestic cotton situation. First trades were fractionally lower.

To Control Cotton Market.
Boston, Mass., July 30.—Having for its purpose the revolutionizing of the cotton industry of the United States, a conference was held at the home of John Hays Hammond, at Gloucester, at which there were present besides Hammond, Daniel J. Sully, the New York cotton operator, and Scott Dalgleish, of Cairo, Egypt, the representative of the Hirsch syndicate of London.

Briefly the idea is to establish warehouses in all parts of the cotton producing districts of this country, as well as in the manufacturing centers, for storing the cotton crop, so that instead of selling it from hand to mouth, as has been the practice heretofore, it will be marketed through the entire year when desirable.

Galveston Spot Cotton.
Galveston, Tex., July 30.—Spot cotton steady and unchanged; middlings, 14 1/2c; today's sales, 21 bales.

St. Louis Wool, Close.
St. Louis, Mo., July 30.—Wool higher. Territory and western middlings, 13c; 23 1/2c; fine mediums, 17c @ 20c; fine, 17c @ 17 1/2c.

Wool.
St. Louis Wool, Close.

The Big Press Runs Between 3:30 and 4:30

No Press Room Secrets About Herald Circulation.

An Investment NOW
IN THE
El Paso Life Insurance Co.

May mean your independence in a few years. Life Insurance stock is the safest---best dividend payer---and the highest form of investment of any stock in the world.

It Is the Safest Because:

In 10 years 95% of Mercantile Business FAILED.

In 10 years over 600 Banks and Trust Companies FAILED.

In 10 years 93 Receiverships were appointed for as many Railroads, BUT

In 30 years there have been NO failures of Old Line Insurance Companies.

THE EL PASO LIFE INSURANCE COMPANY is chartered under the Old Line Plan—for both General Life and Accident Business.

This is **THE ONE REPEATING** business in which the patron contracts to repeat **EVERY YEAR. THINK OF THIS.** You are bound to make more money every year and your charter is good for 500 years.

Best Dividend Payers

1415 Savings Banks, in 1907, with aggregate Capital of 850 millions and Deposits of 3600 millions, earned 150 millions—about 17.2-3%. 156 Life Insurance Companies, with aggregate Capital of 20 millions and Deposits (Premiums) of 3066 millions, earned 135 millions—about 675%, and a Life Insurance Company **NEVER** issues "white paper" nor "clearing house receipts." It is the **ONE BUSINESS** which always pays **CASH**.

The Highest Form of Investment

Stock fully paid-non-assessable. Over 500 Texas Bankers hold stock in Texas Life Insurance Companies. We can give you their names and addresses on application. \$100.00 invested in the Union Central Life, Travelers Life, Aetna Life, Metropolitan Life or Equitable of N. Y. is today worth from \$5000.00 to \$72,000.00. Pittsburg Life began business in 1903; stock worth better than 1 to 1. Citizens Life began business in 1904; stock rated better than 4 to 1. Philadelphia Life began business in 1905; stock rated 5 to 1. Guaranty Life, of Houston, (a Texas Company) began business in 1906; paid more than 40% last year in dividends.

And these companies (as have all others) have paid increasing dividends to their stockholders every year. Why not **EL PASO LIFE**? You are absolutely false to yourself and your home and local interest if you do not take stock in **EL PASO LIFE**. And you are losing **THE ONE BEST INVESTMENT OF YOUR LIFE**.

Premiums collected from Texas people by outside companies in 27 years amounted to over 93 millions, which was sent out of the State and only a little over 30 millions paid back in losses, etc.

THE EL PASO LIFE INSURANCE COMPANY, aside from entering several other states immediately, will operate in Southwest Texas, New Mexico, Arizona and Old Mexico. **ITS INVESTMENTS** will be made **AT HOME**—El Paso and surrounding territory.

THE EL PASO LIFE INSURANCE COMPANY is capitalized for \$200,000.00—2000 shares par value \$100.00 each—and the stock is being sold at a premium in order to create a working surplus from the beginning.

The first allotment of 400 shares each has been exhausted. There still remains a small portion of the second allotment of 400 shares unplaced. After the third allotment has been placed the stock will be again advanced. The Company will then be in a position to begin business.

We court the fullest and most complete investigation of our Company. We are more desirous to get a large number of shareholders than to get a few stockholders for a large amount—the more boosters for the Company the more business it will get. We take no proxies and are not trying to do other than to make **FOR YOU** the **BEST** Company in existence.

GET OUT ON THE PORCH

You Can When You Have A Gas Range

If you have a gas range you probably aren't reading this advertisement, because, you know by experience all the good things that can be said of gas.

So, we'll take it for granted that you use a coal stove. Now, how many hours do you spend in the kitchen? Figure it up.

How long does it take you to get those three meals a day? How long to bring in coal and kindling? How long to wipe up the dirt left by smoke and soot and coal dust? How long to clean out the ashpan? How long do you have to sit in the hot kitchen of an afternoon waiting for your bread to bake?

Figure it all up—then, consider. If you had a gas range you would have no coal or kindling to bring in, neither would you have any ashes to carry out. If you had a gas range you could put your bread in the oven and leave it there without watching—go out on the front porch or your neighbor's porch with a placid mind.

Think of all the minutes you now spend in the kitchen that you could spend on the front porch.

But, think again. If you had a gas range you would cook your meals in just one-half the time it now takes you. Because, the heat of a gas flame is so much more intense than that of a coal fire.

And then, think of this. When you use a coal stove, you must go into the kitchen early, in order to "start the fire" so it will be hot enough when you are ready to use it. You don't have to do that with a gas range. Turn a valve, strike a match, and there's your **HOT** fire immediately.

Figure it for yourself, the amount of time you should have for rest and amusement that you must now spend in the kitchen.

and the market ruled quiet. There was no effect on the new condition of the report by the national ginners in movement prices. Trade is quiet, talent waiting for developments over the end of the month. The weather map today shows absolutely no rain in the important cotton belt and reports continue to be a very bullish nature. Some private reports say that rain must come at once if any good to this crop results.
